Highlights

The Model Knows the Textbook but Not Your Class: Curriculum Knowledge Graph Constraints for Slide Generation in Two Vocational-Education Courses

- Course-level knowledge is absent from pretraining data; it must be supplied.
- One contract is prompt and acceptance test, so requirement and check cannot drift.
- Coverage rises from 0.61–0.70 to 0.98; a matched placebo rules out prompt length.
- Misconceptions 1.000 (0.000) vs 0.556 (0.527), but 0.833 (0.408) on a third model.
- Ordering marks the representation's edge; its ablation deletes a duplicate.
